

FULL STACK SECURITY ASSESSMENT

RSA Survey 2019

FULL STACK SECURITY ASSESSMENT

RSA 2019 SURVEY

We asked 121 security professionals during RSAC in San Francisco about their approach to securing their entire IT estate

Survey Highlights

- **31%** of respondents admitted that their company has ignored a security issue so a product could be rushed out
- **44%** of organizations do not introduce security into the development cycle from the beginning
- **23%** of organizations do not thoroughly test security of products before they are launched

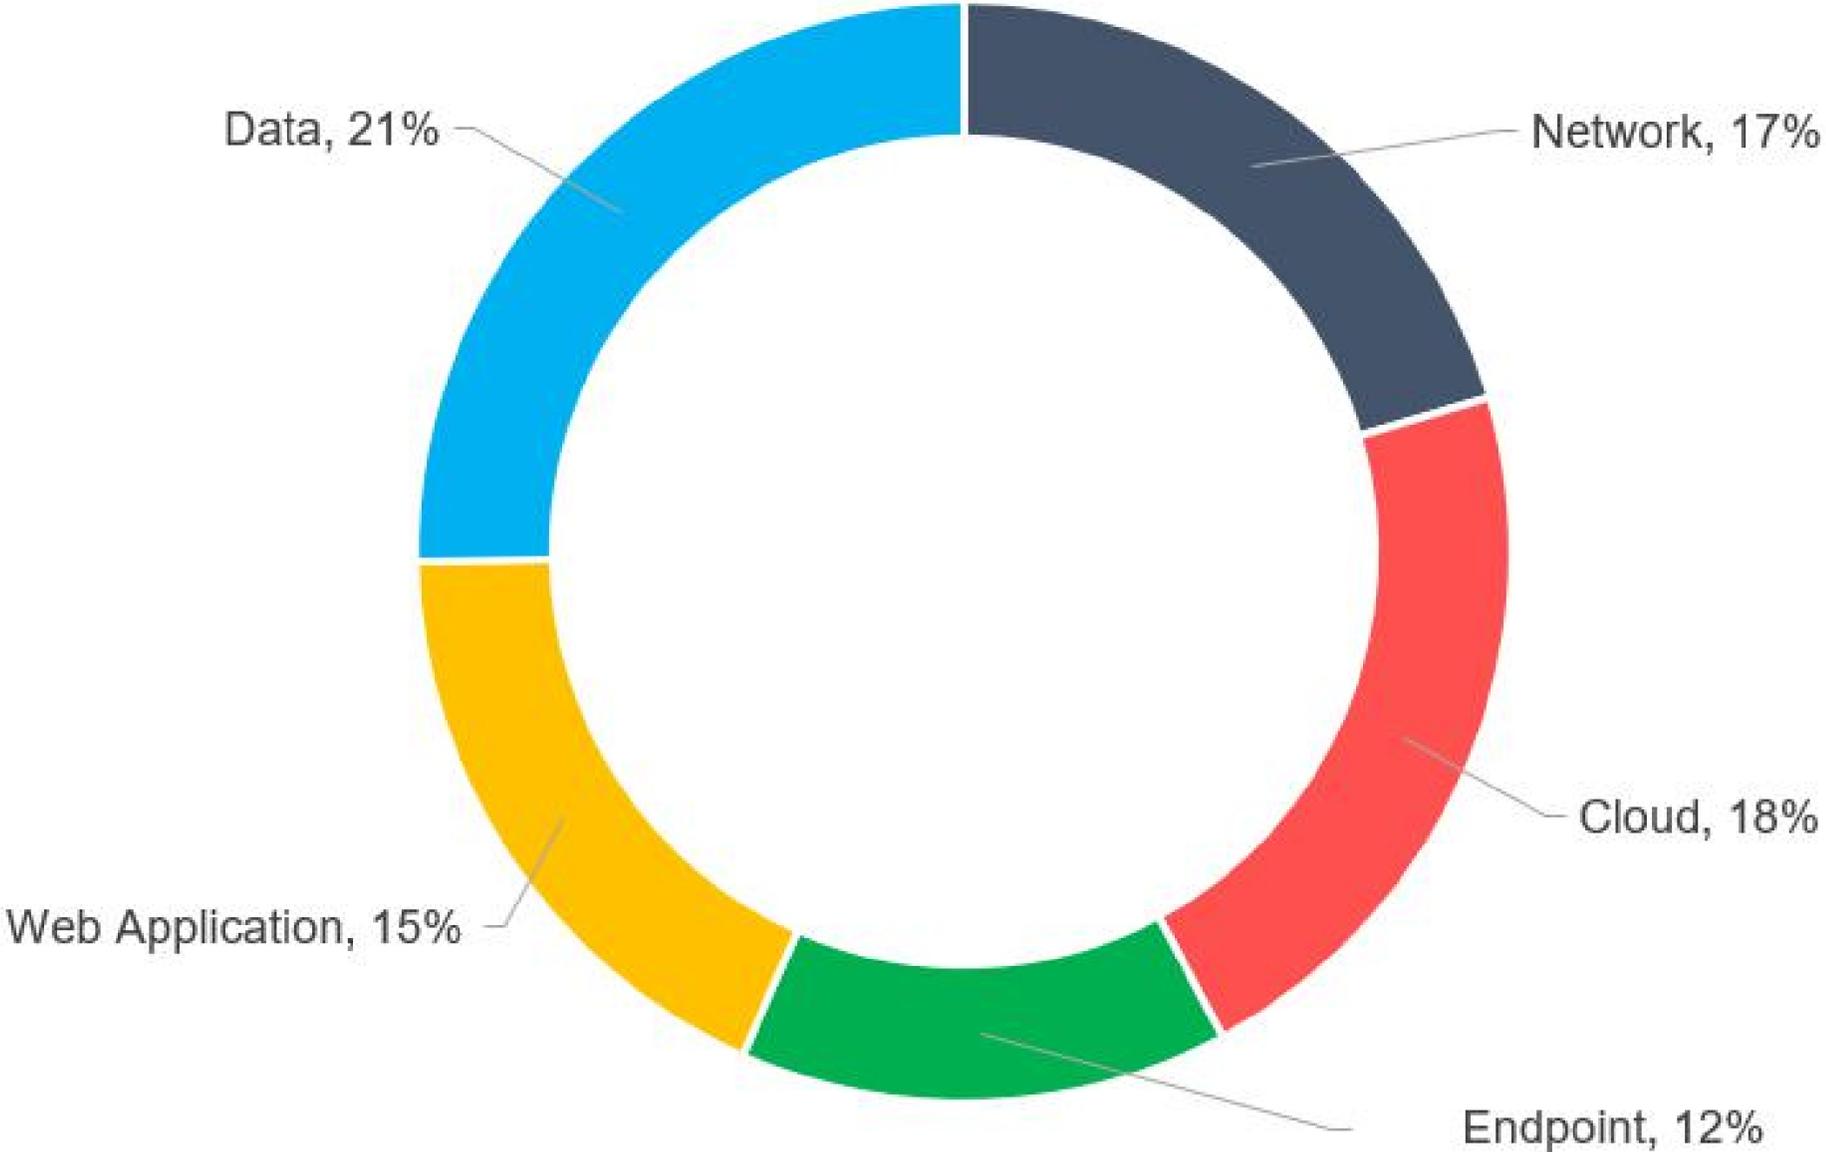

- Almost **one in ten** survey respondents said their organization's security budget is falling, while **26%** said it is staying the same
- **36%** do not think their board has a good enough understanding of the security risks targeting their organization

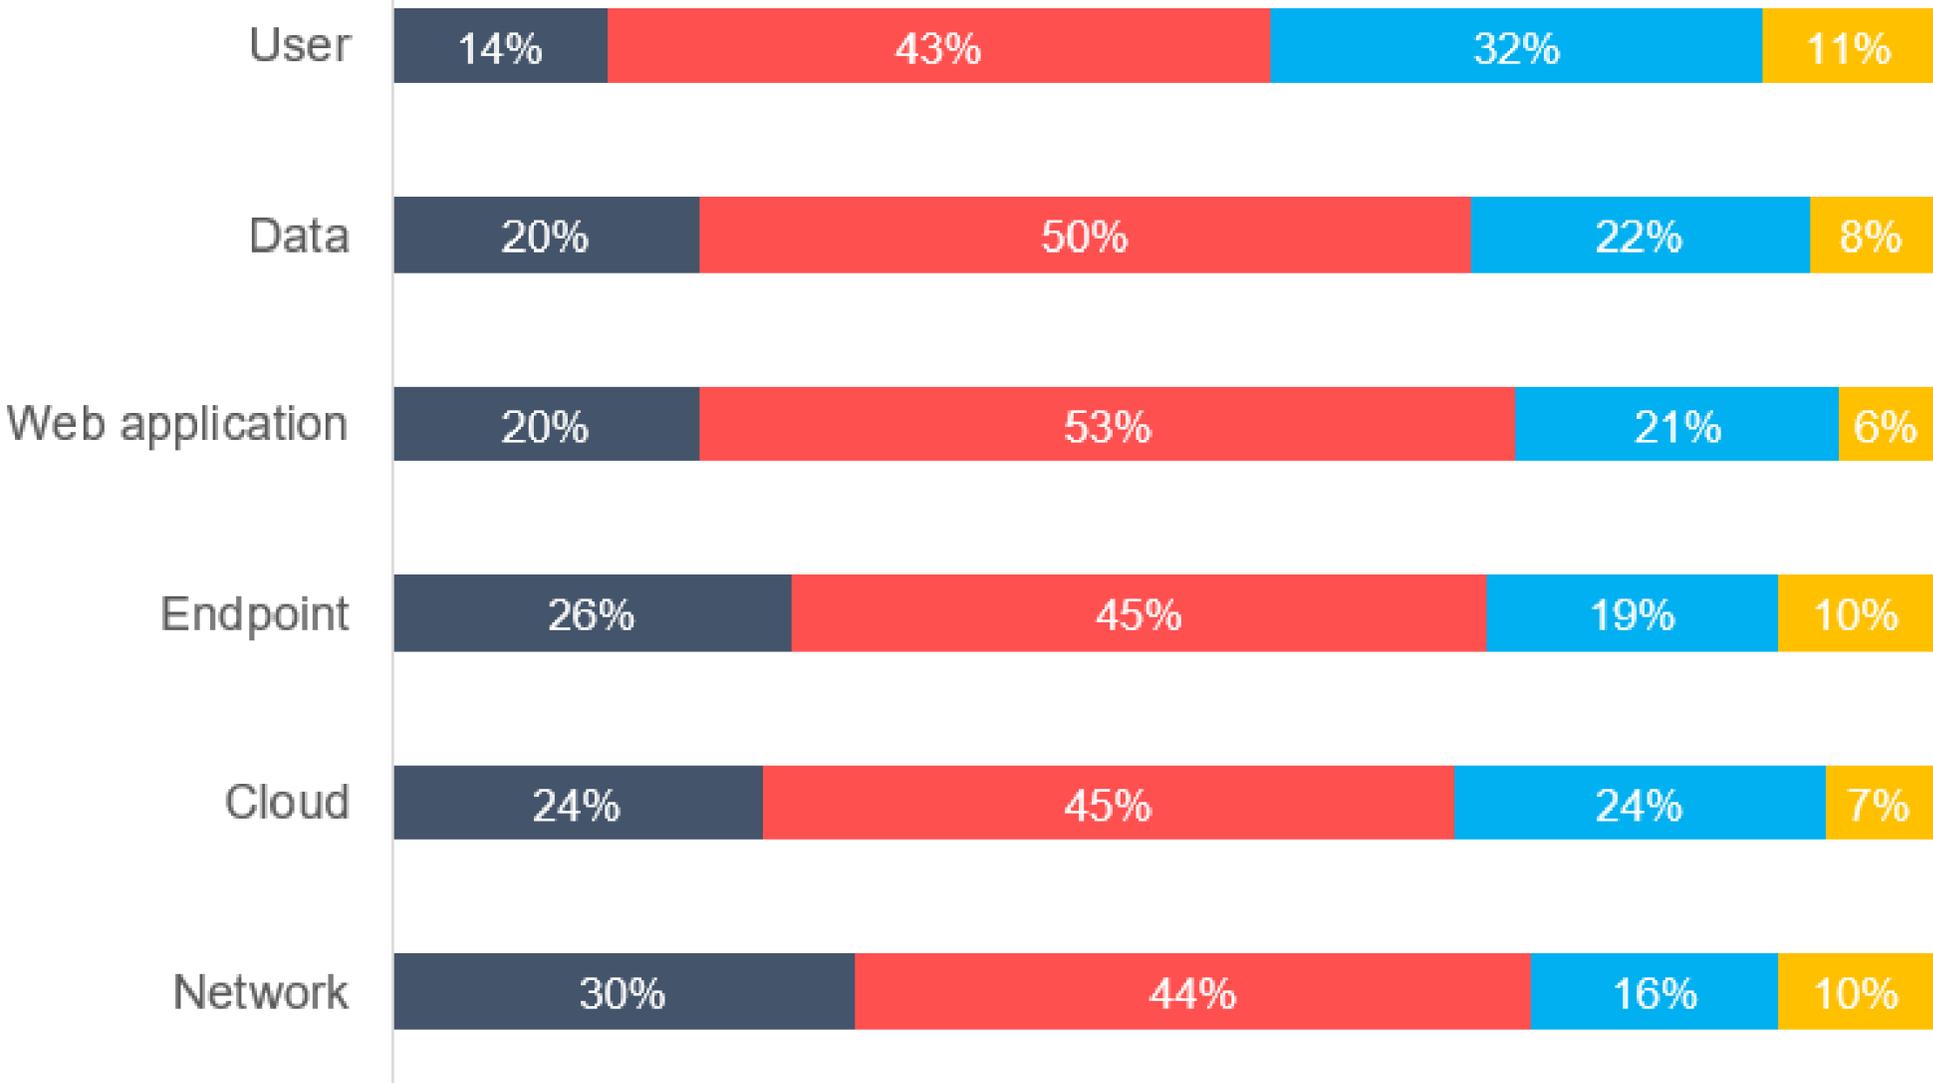

- **62%** of respondents do not believe or are unsure that their organization's critical data and assets are comprehensively protected
- **21%** of respondents said their organization is least prepared for cyberattacks because they do not have the knowledge / expertise in-house

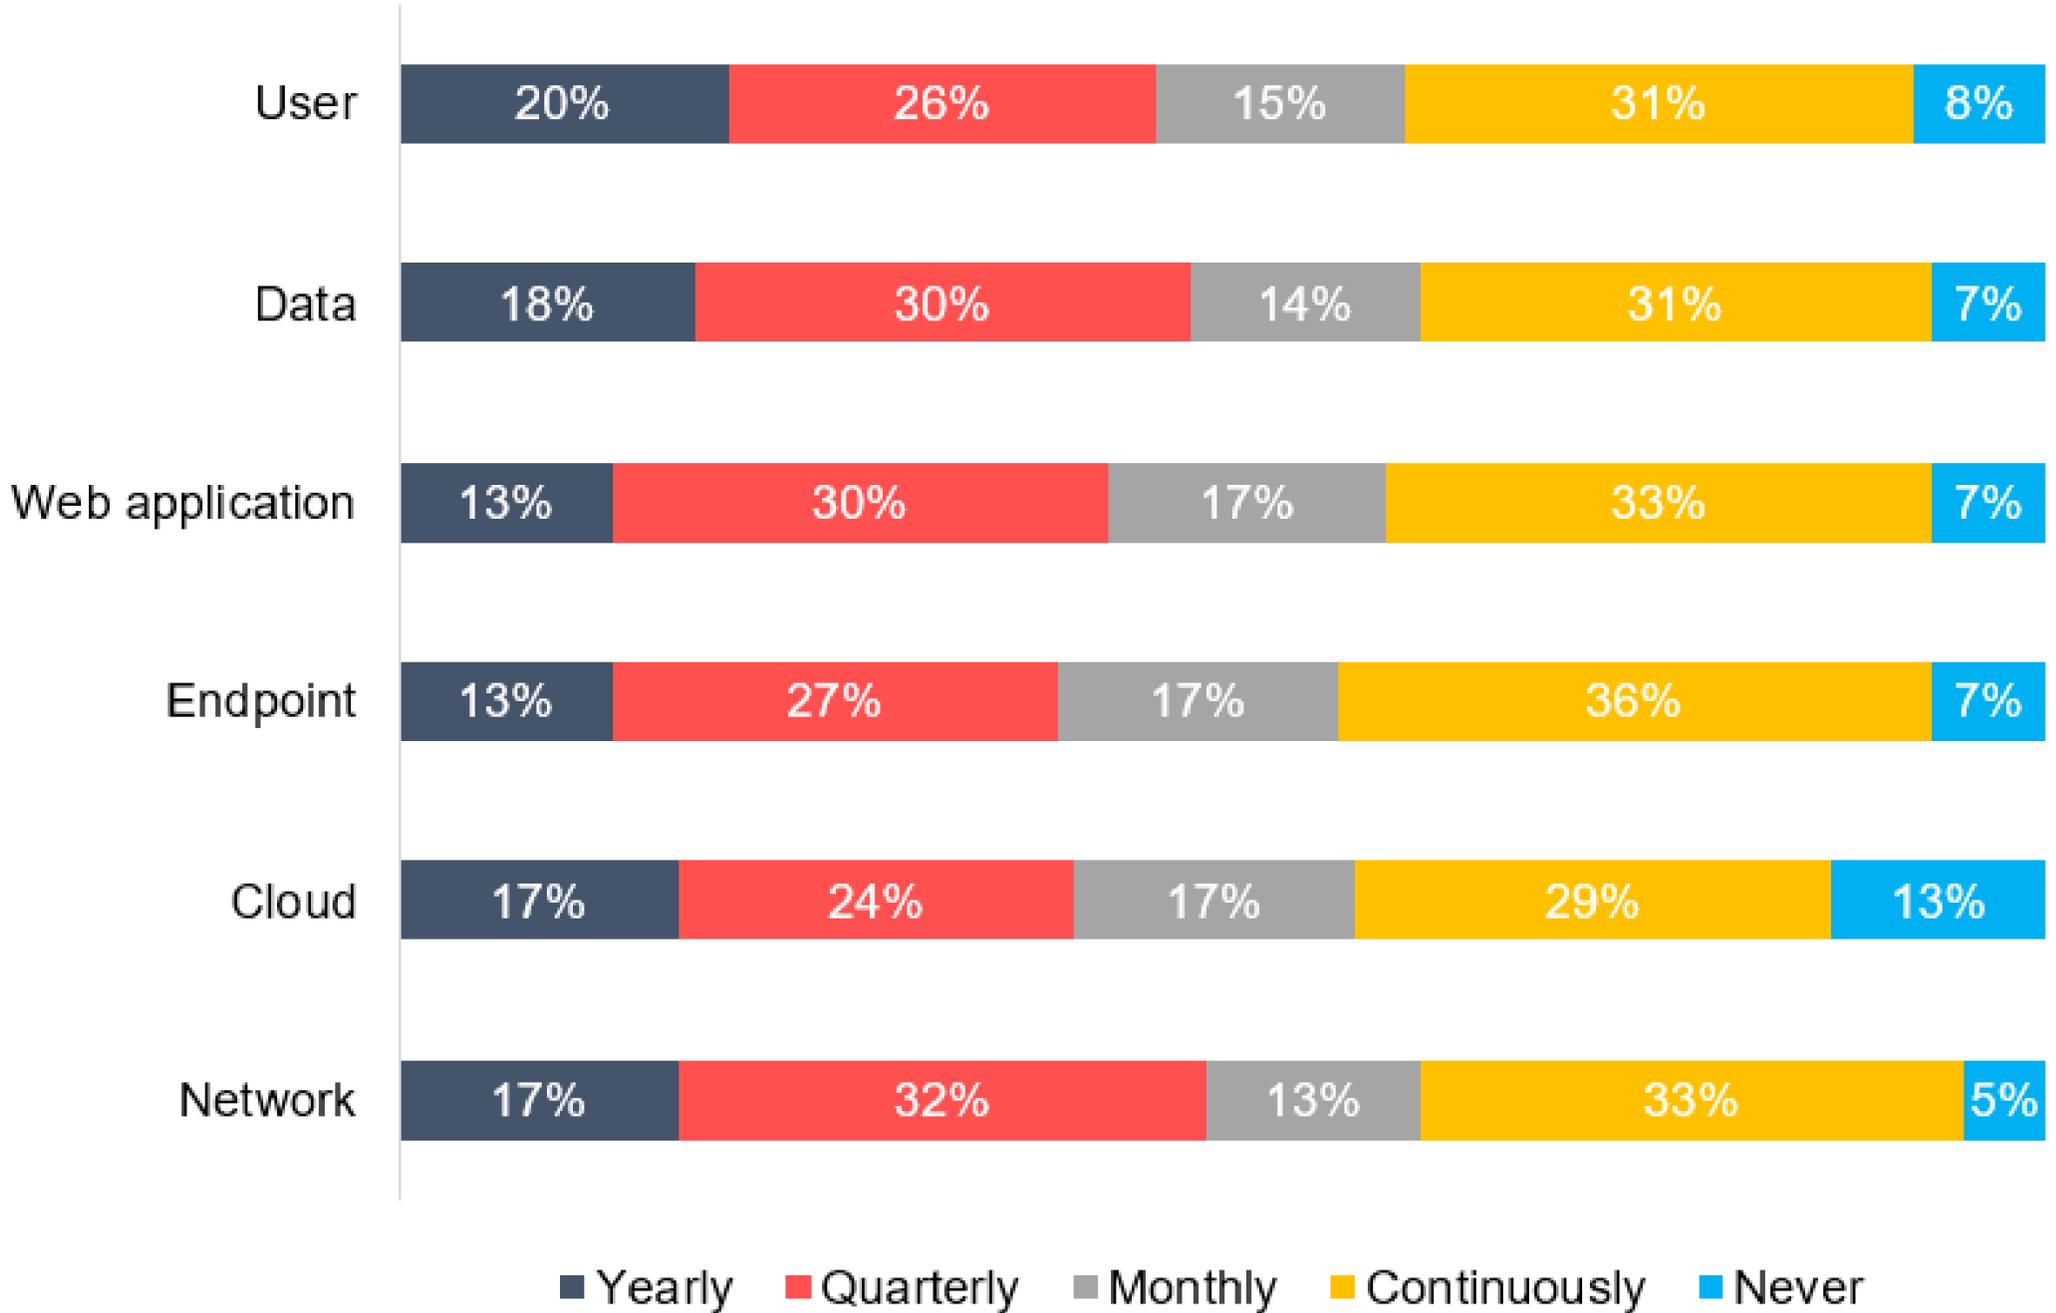

Q1. What type of attack do you believe could cause the most disruption to your organization?

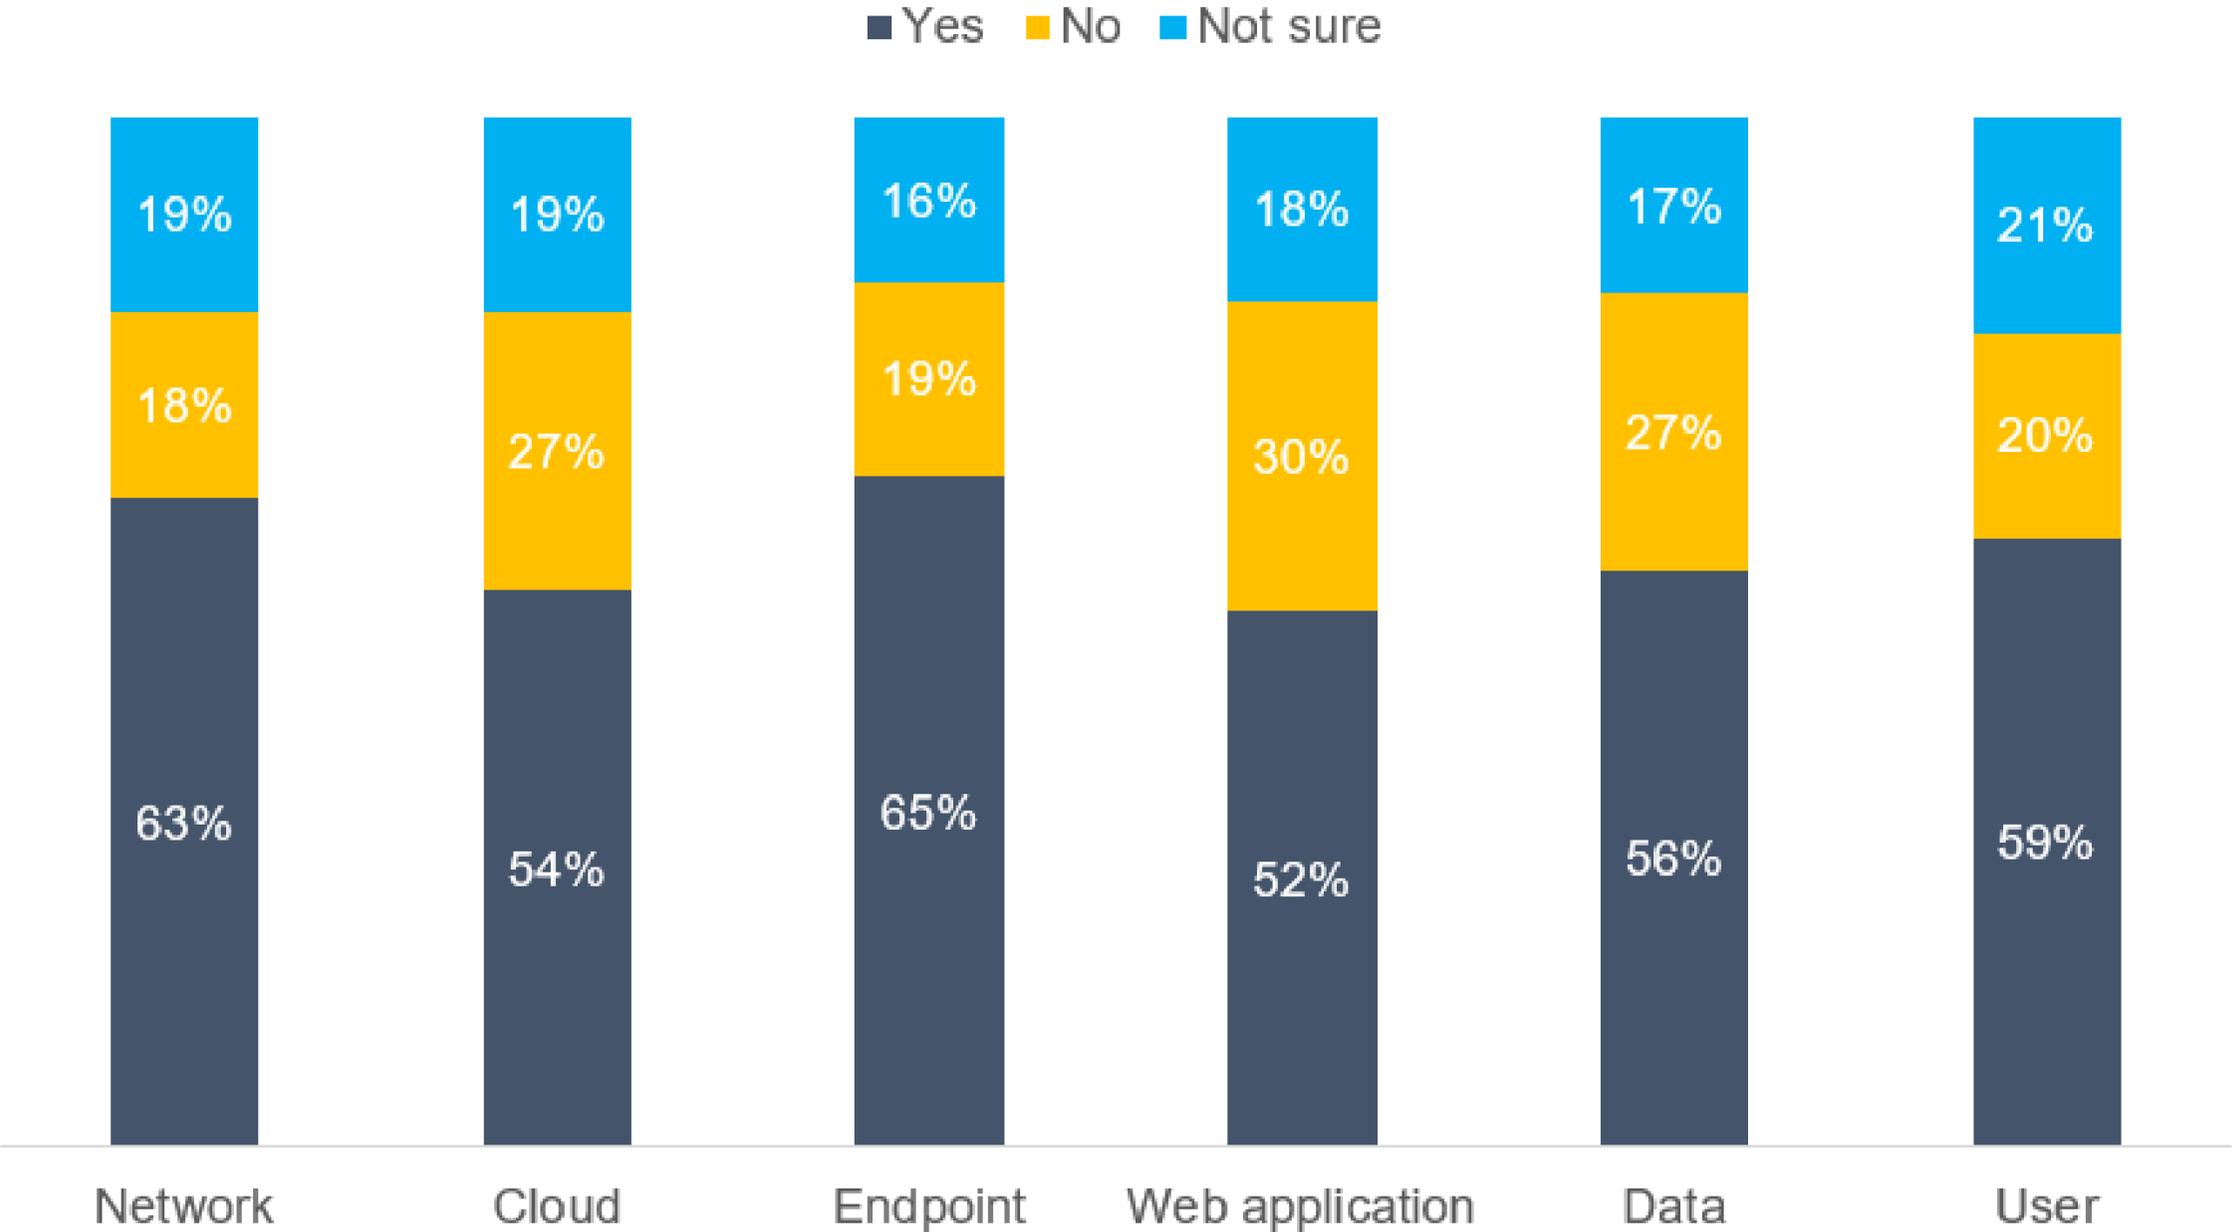

Q2. How confident are you that you are secured against these attacks that could cause disruption to your organization?

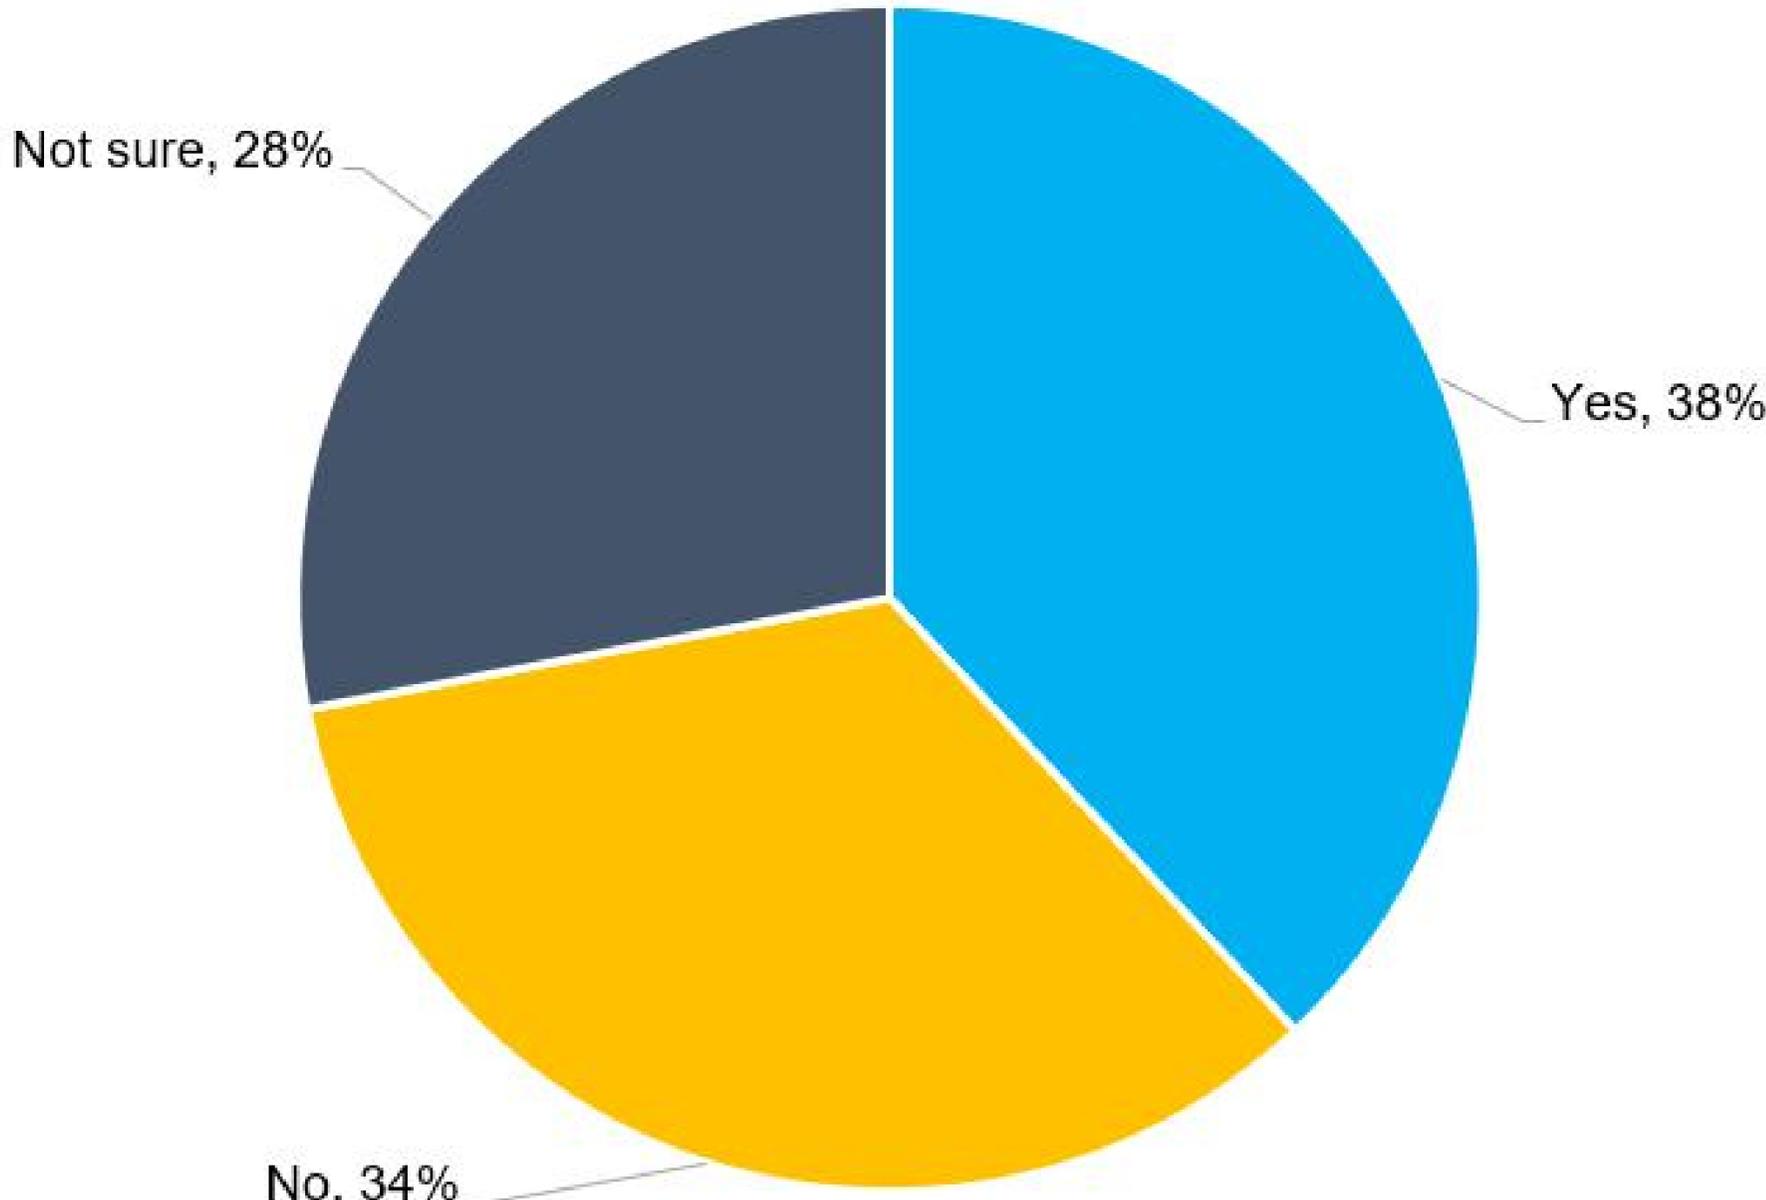

Q3. How often does your organization run security assessments for the following?

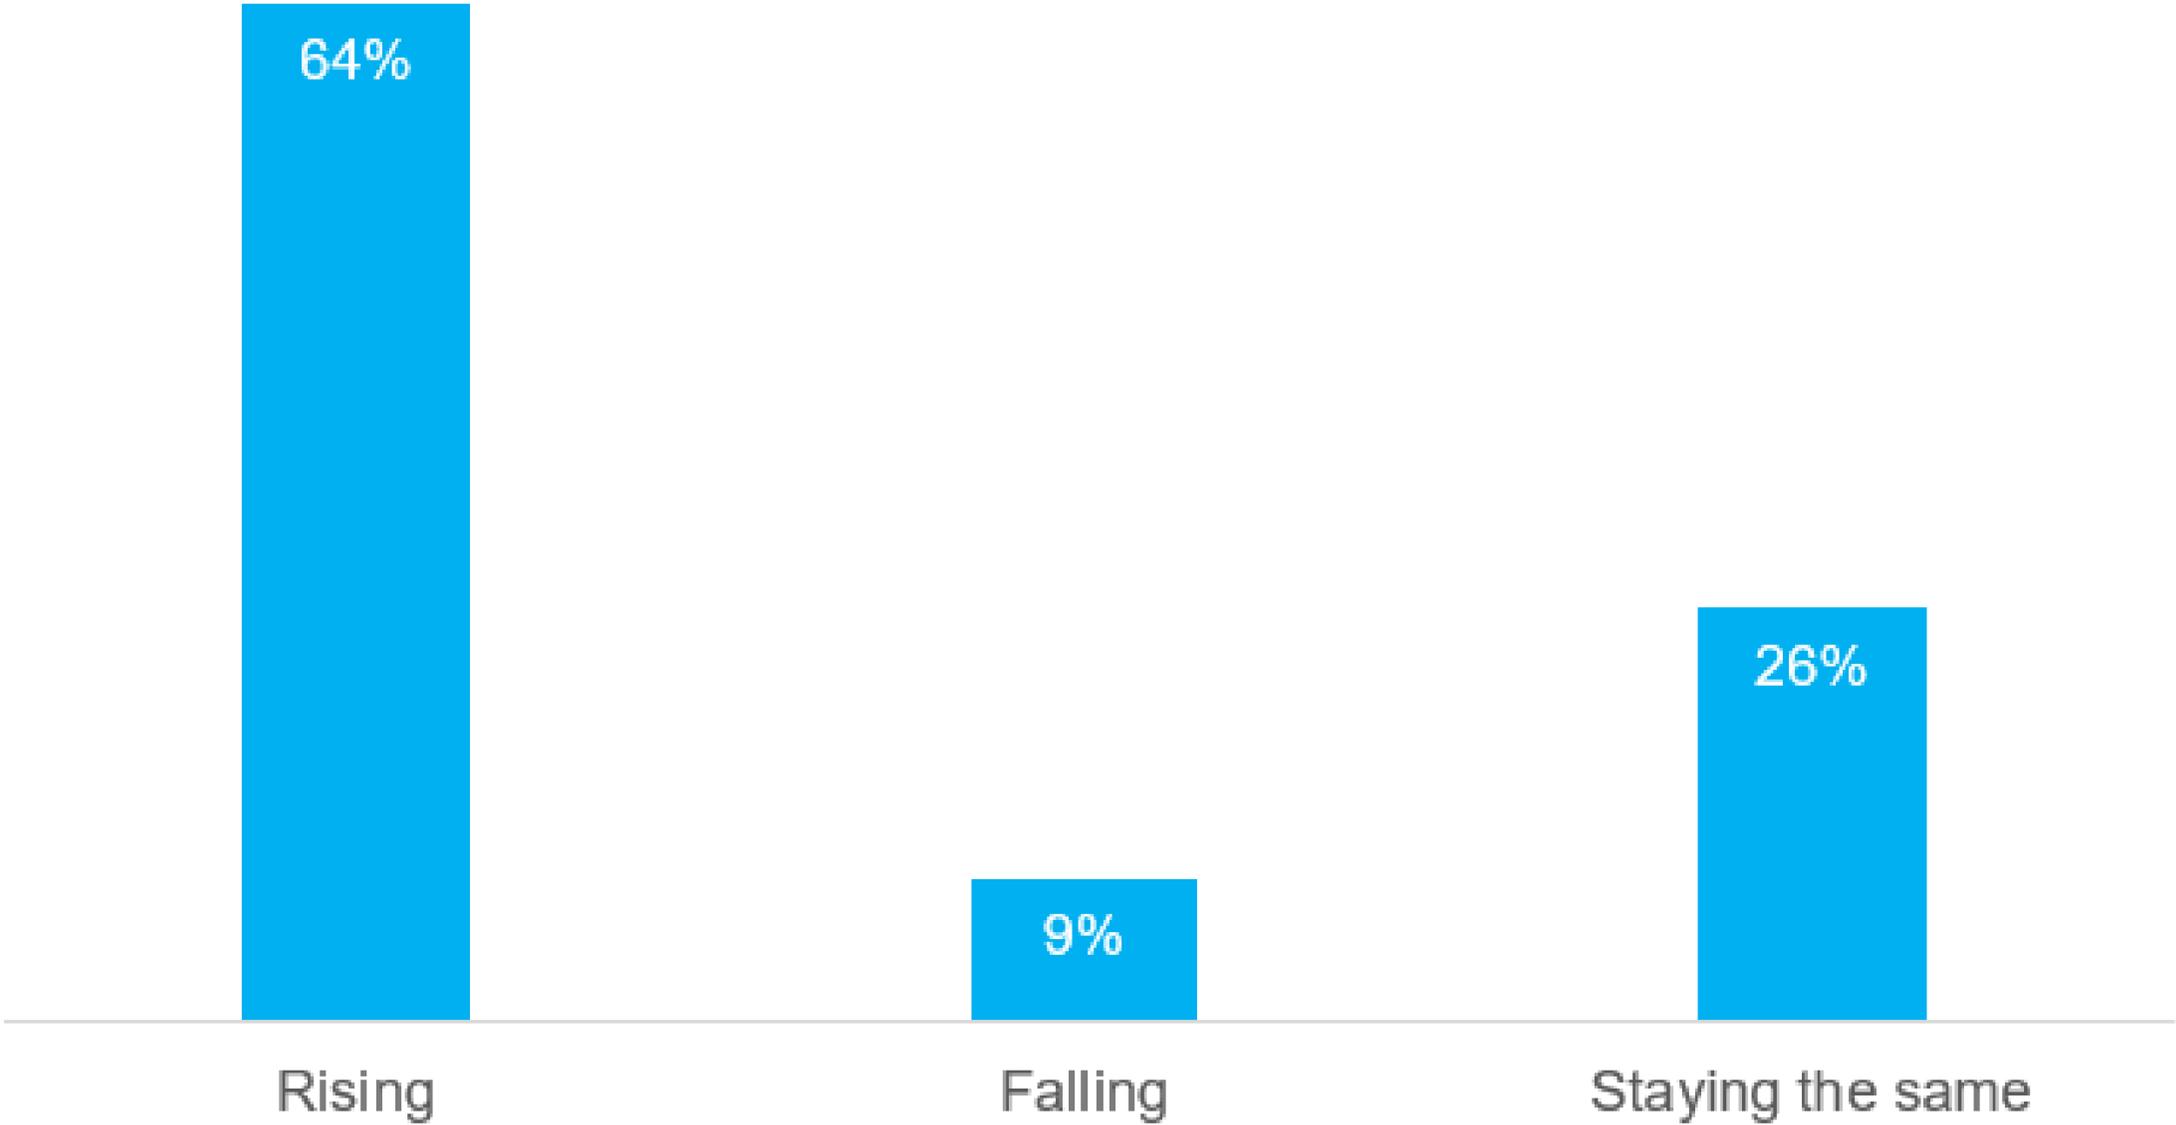

Q4. Do you feel you have a good enough understanding of your organization's security issues in each of the area?

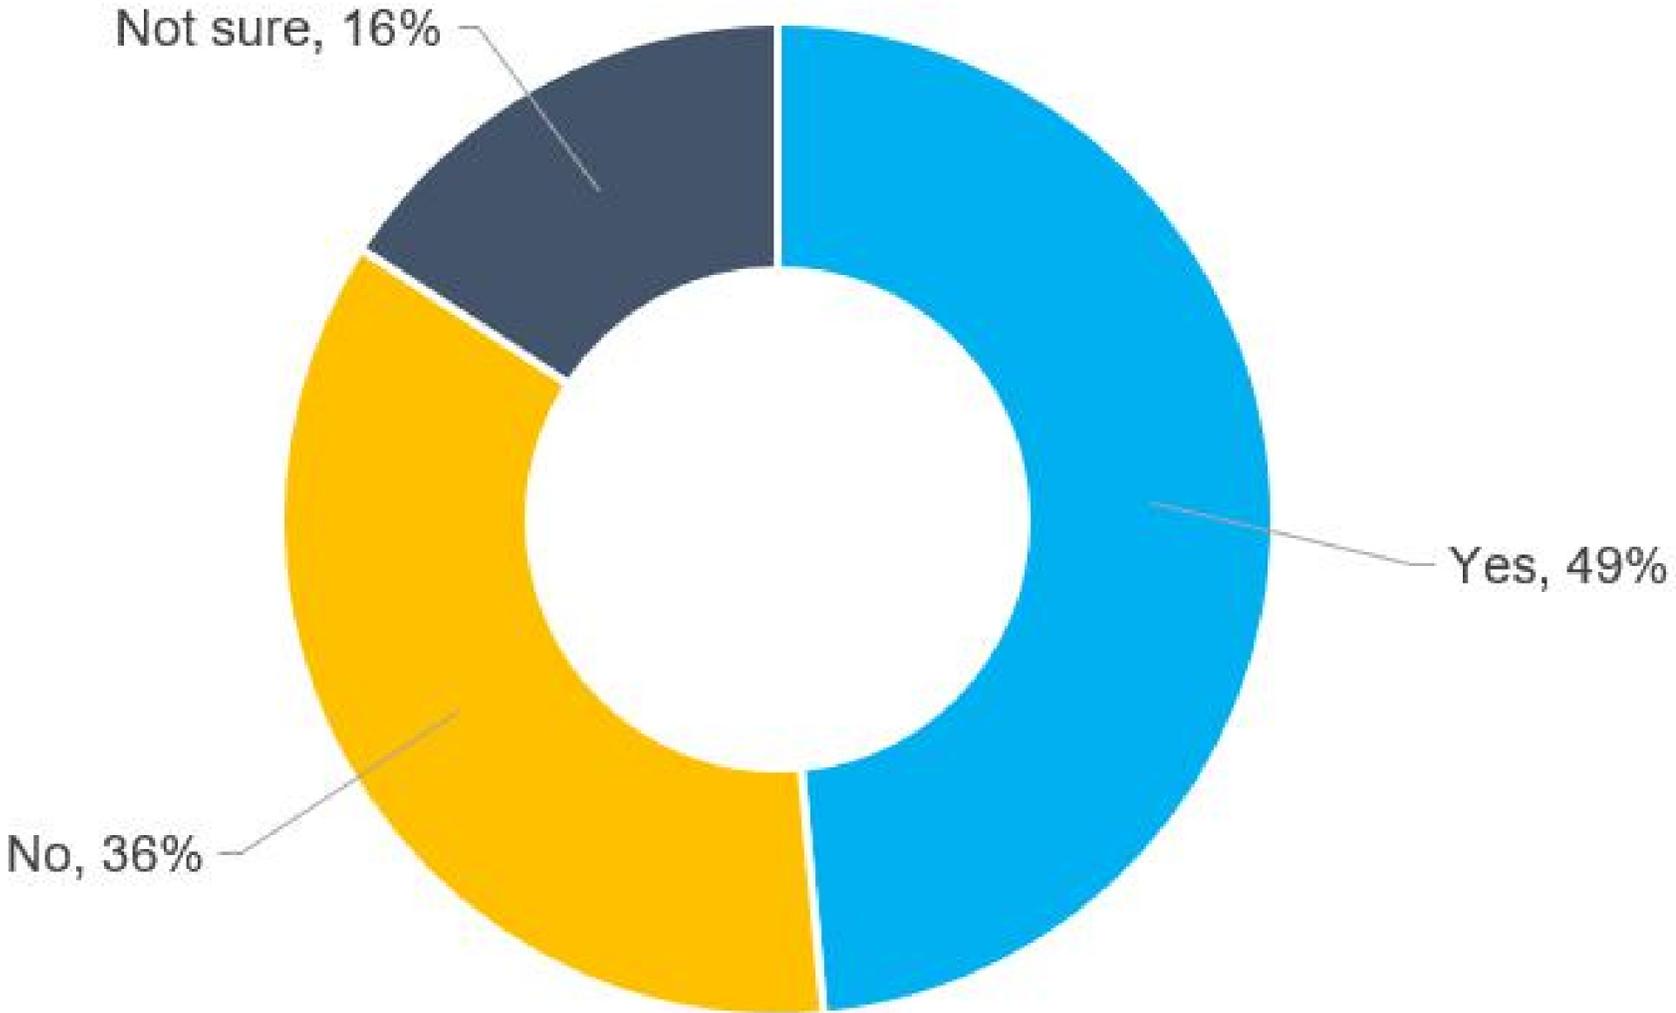

Q5. Do you believe all of your organization's most critical business assets are comprehensively secured?

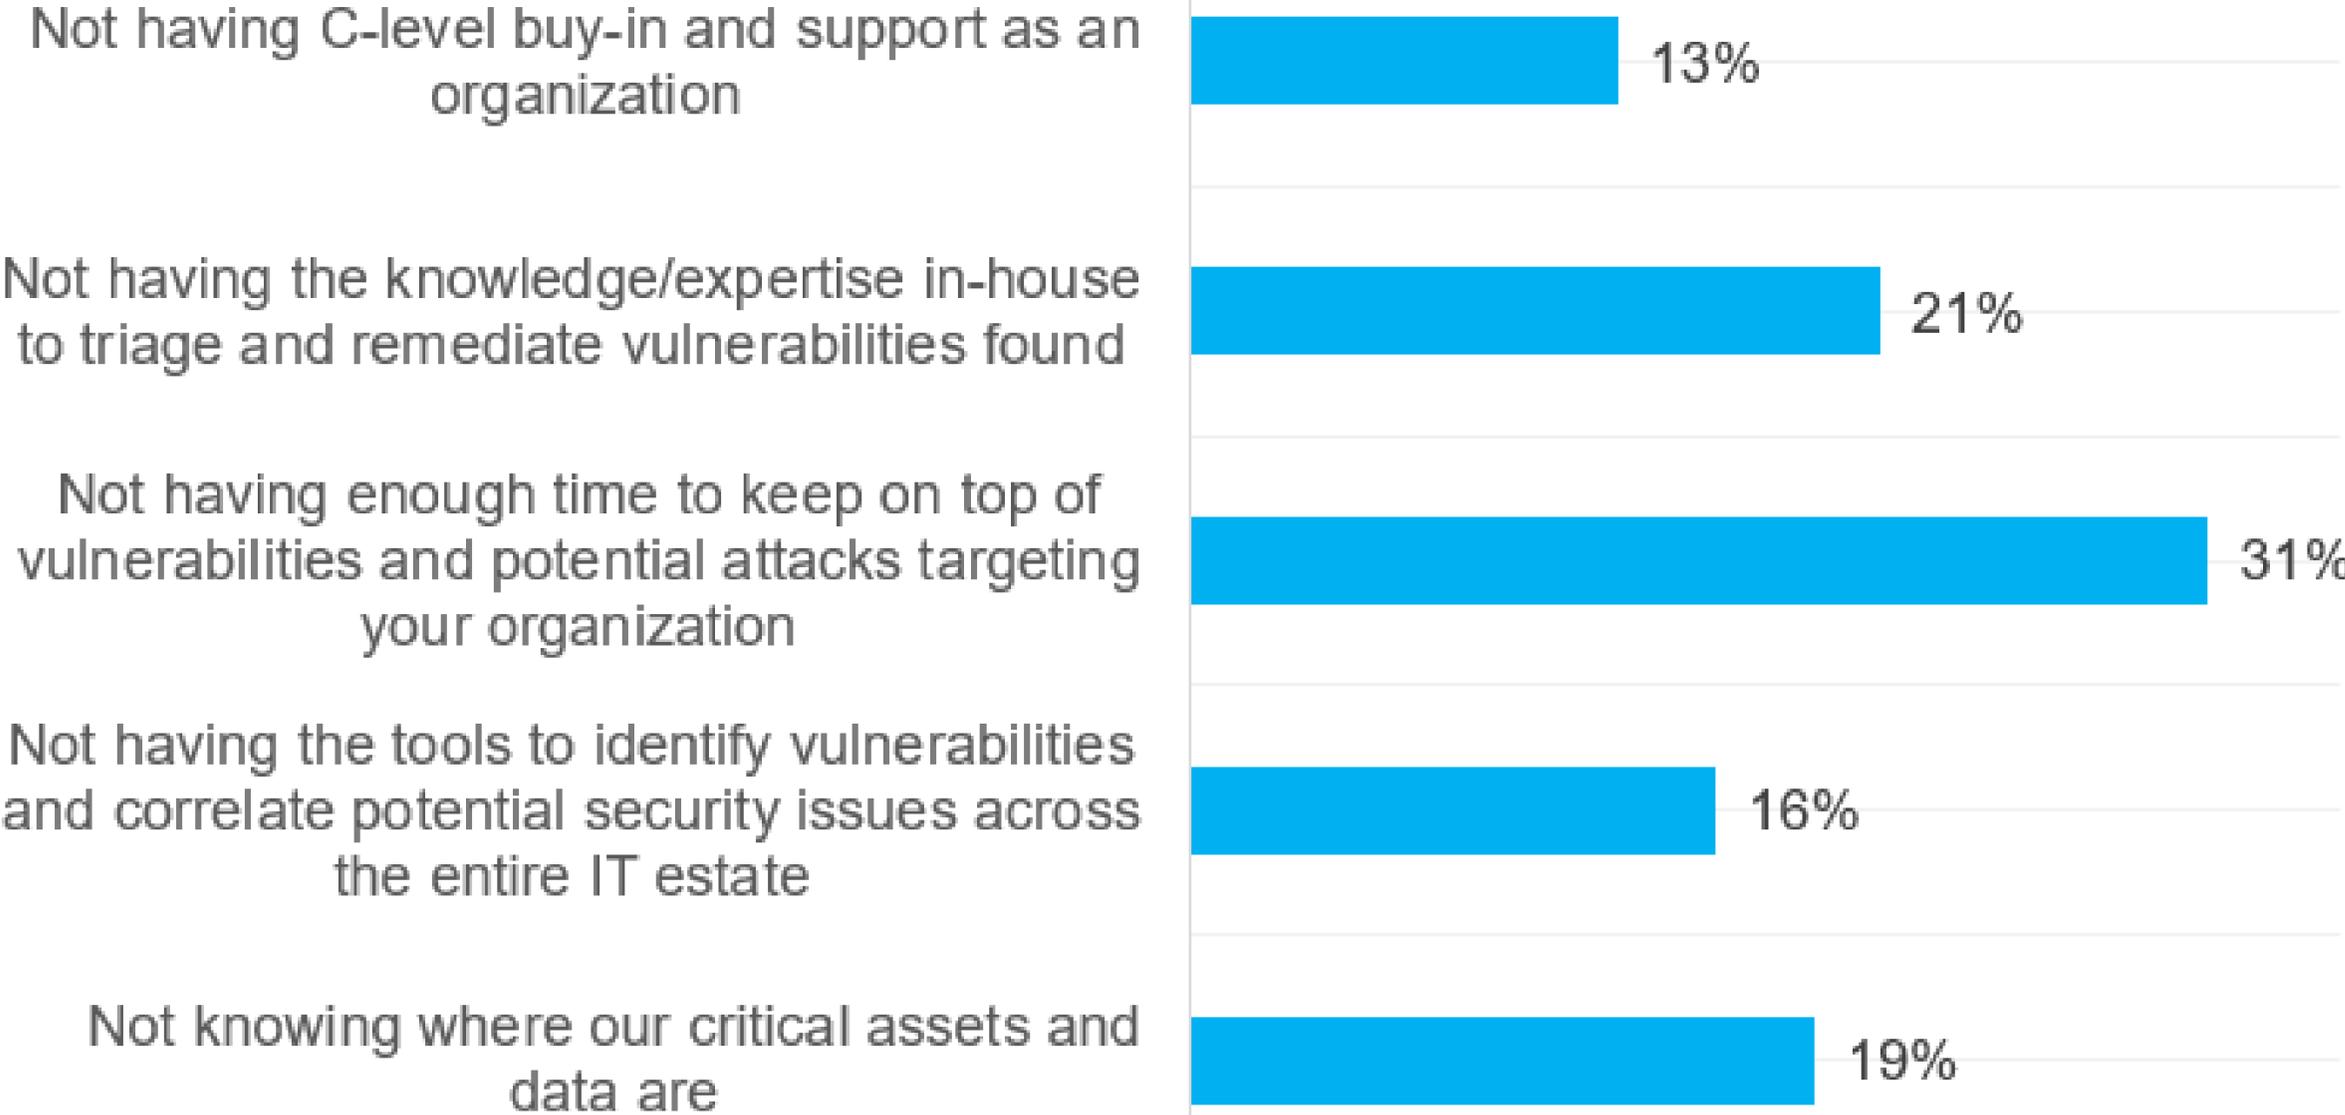

Q6. What are the trends for your organization's cyber security budget?

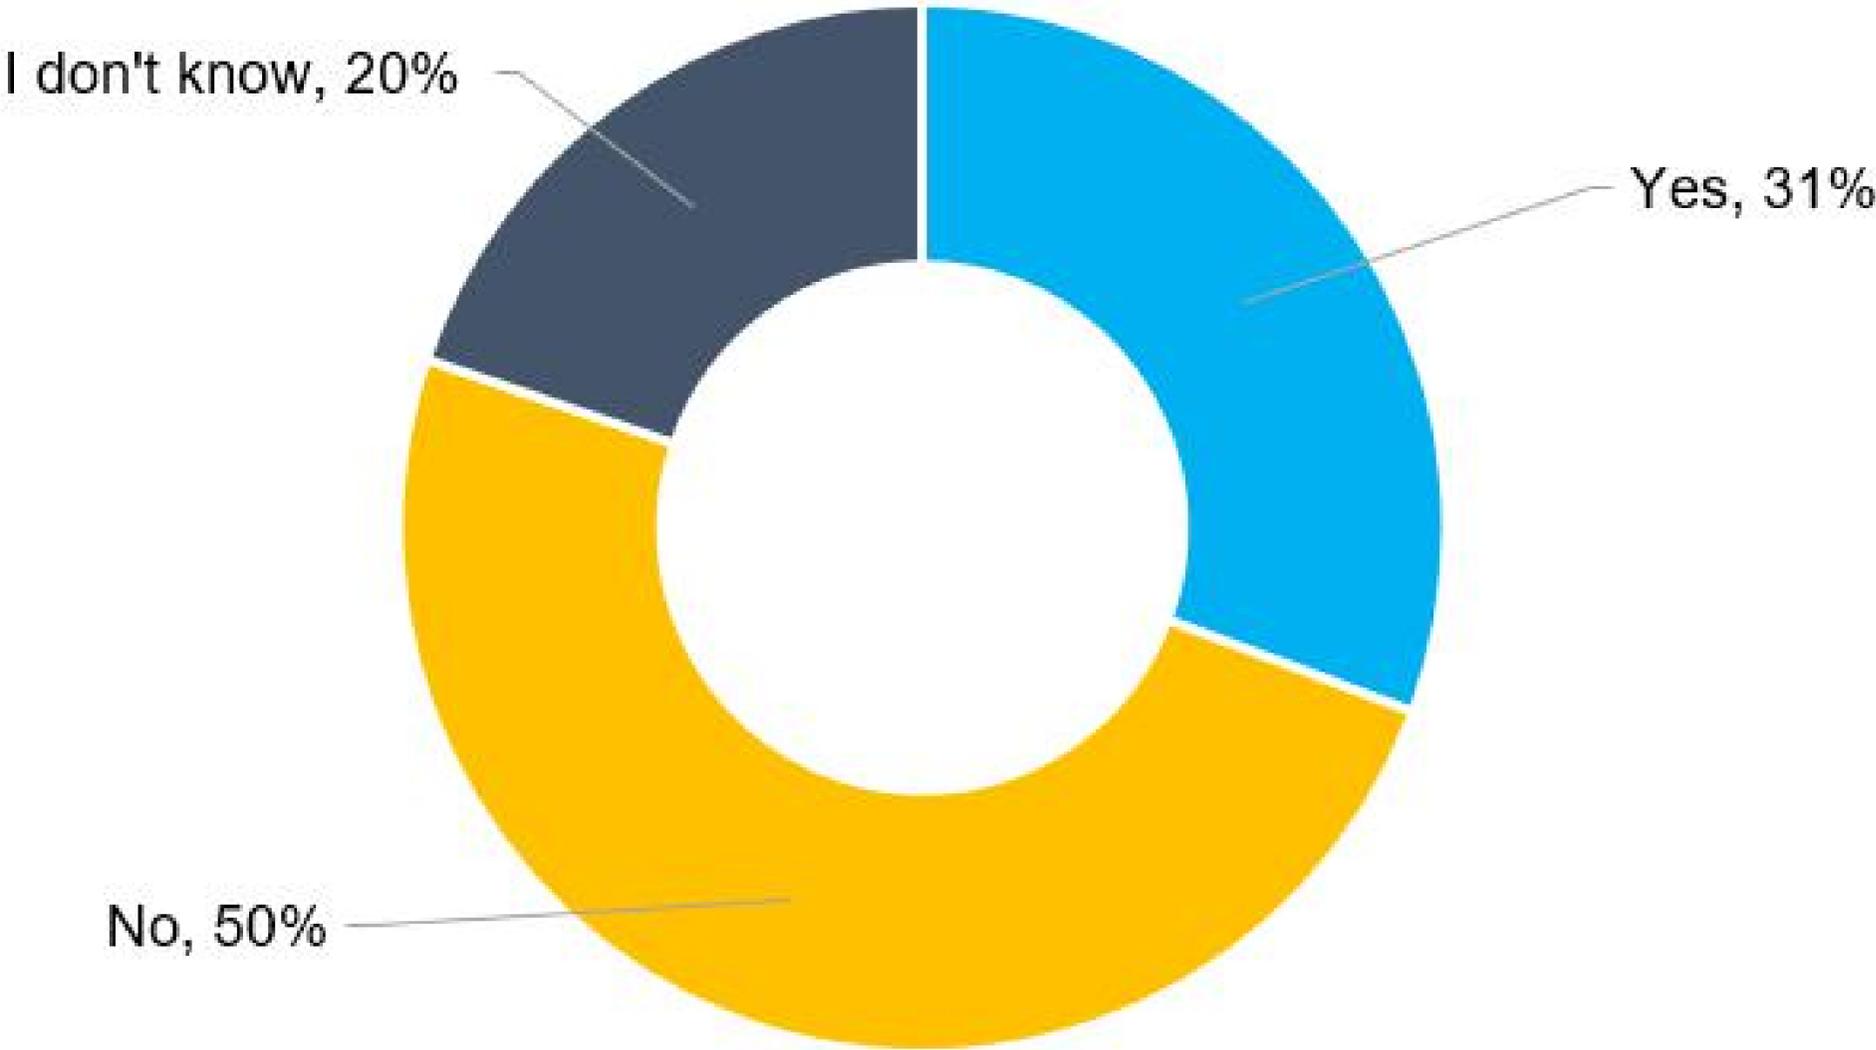

Q7. Do you believe your C-level executives and board members have a good enough understanding of the security risks targeting your organization?

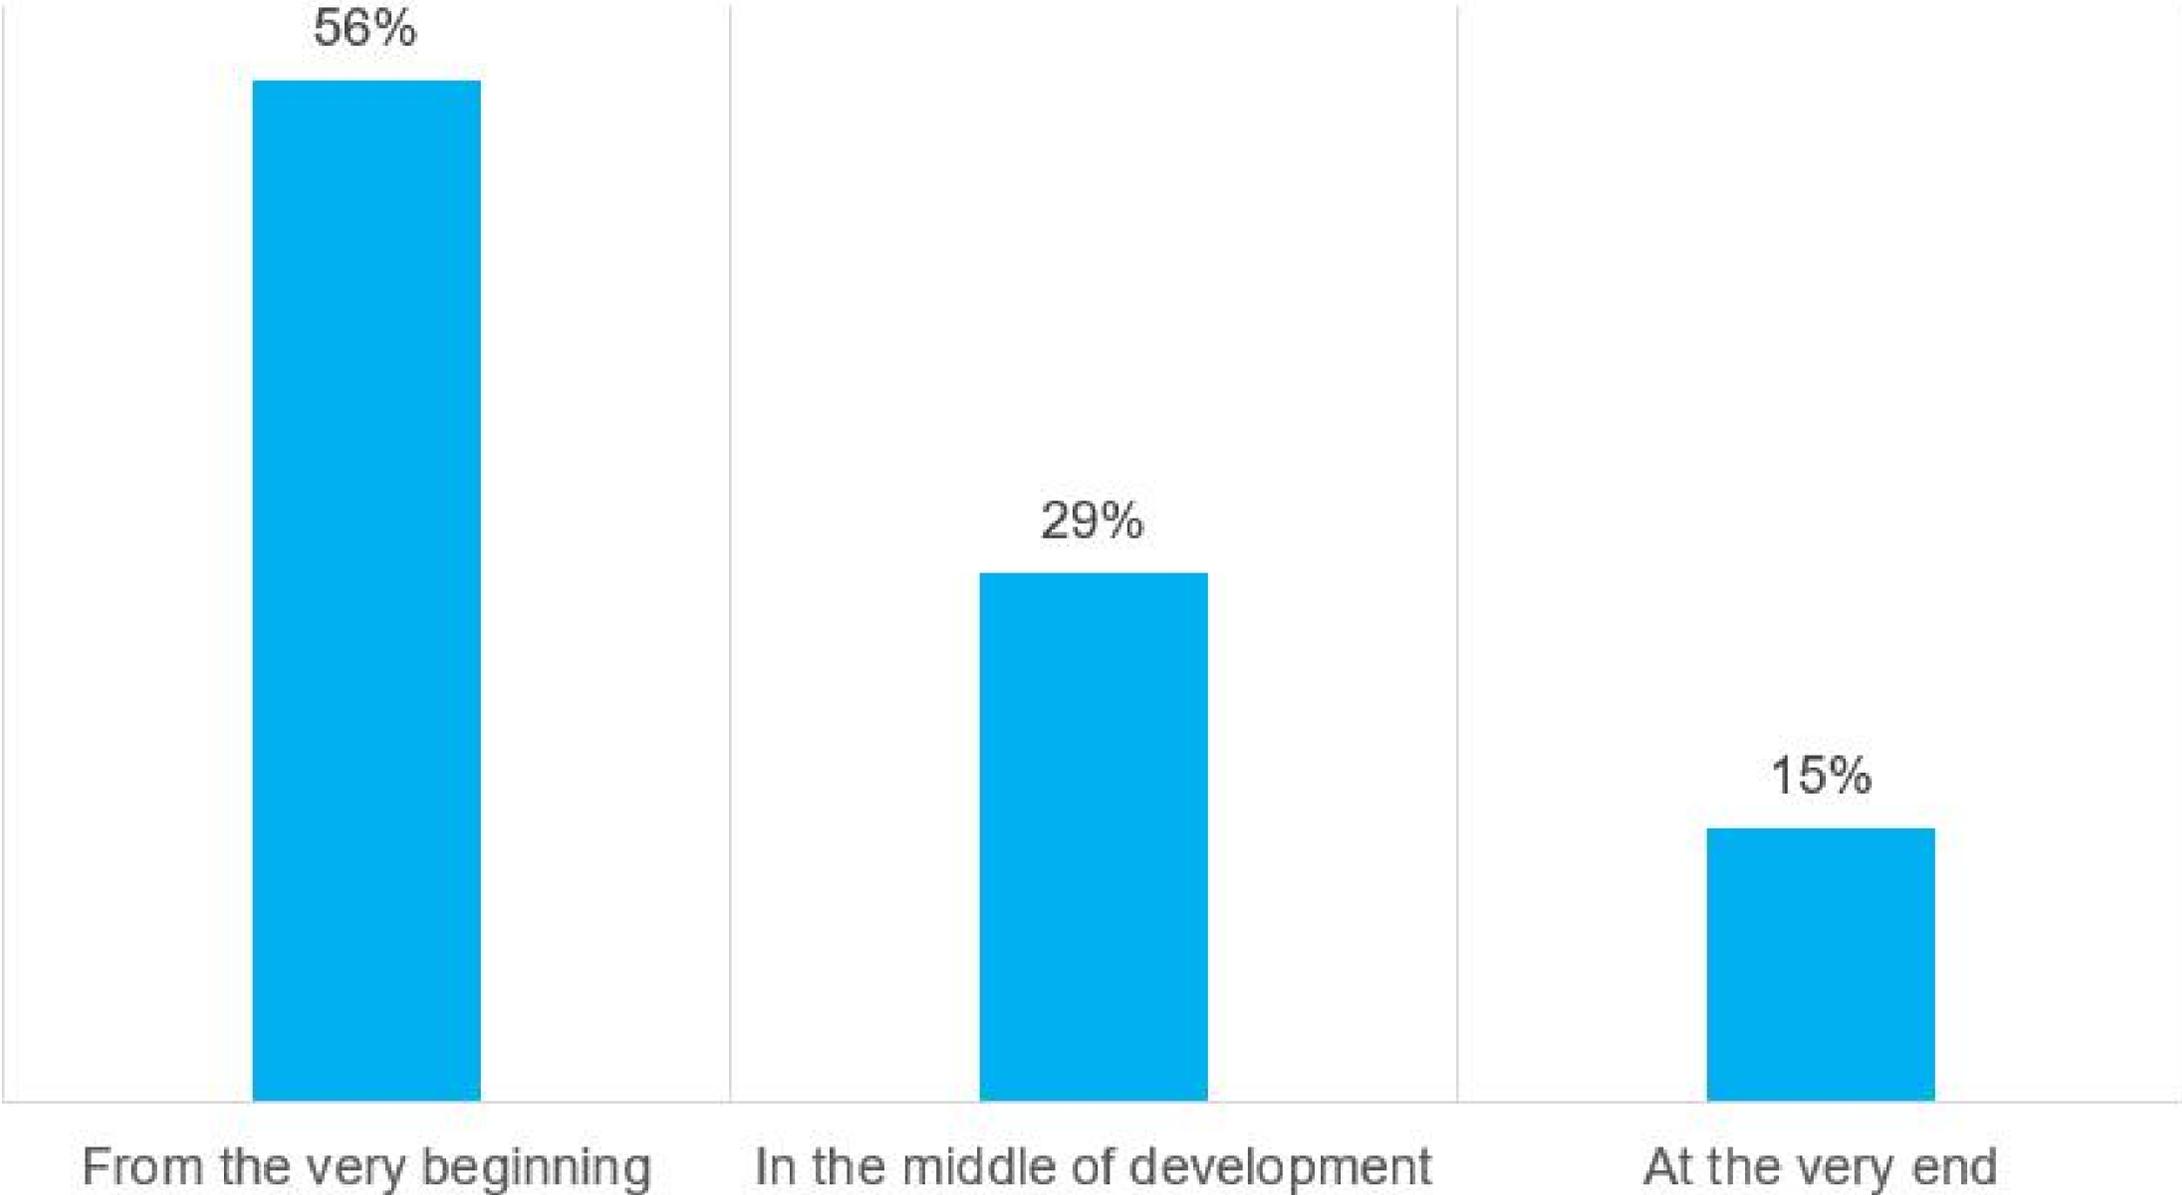

Q8. When it comes to cyberattacks targeting your organization, what makes your organization least prepared?

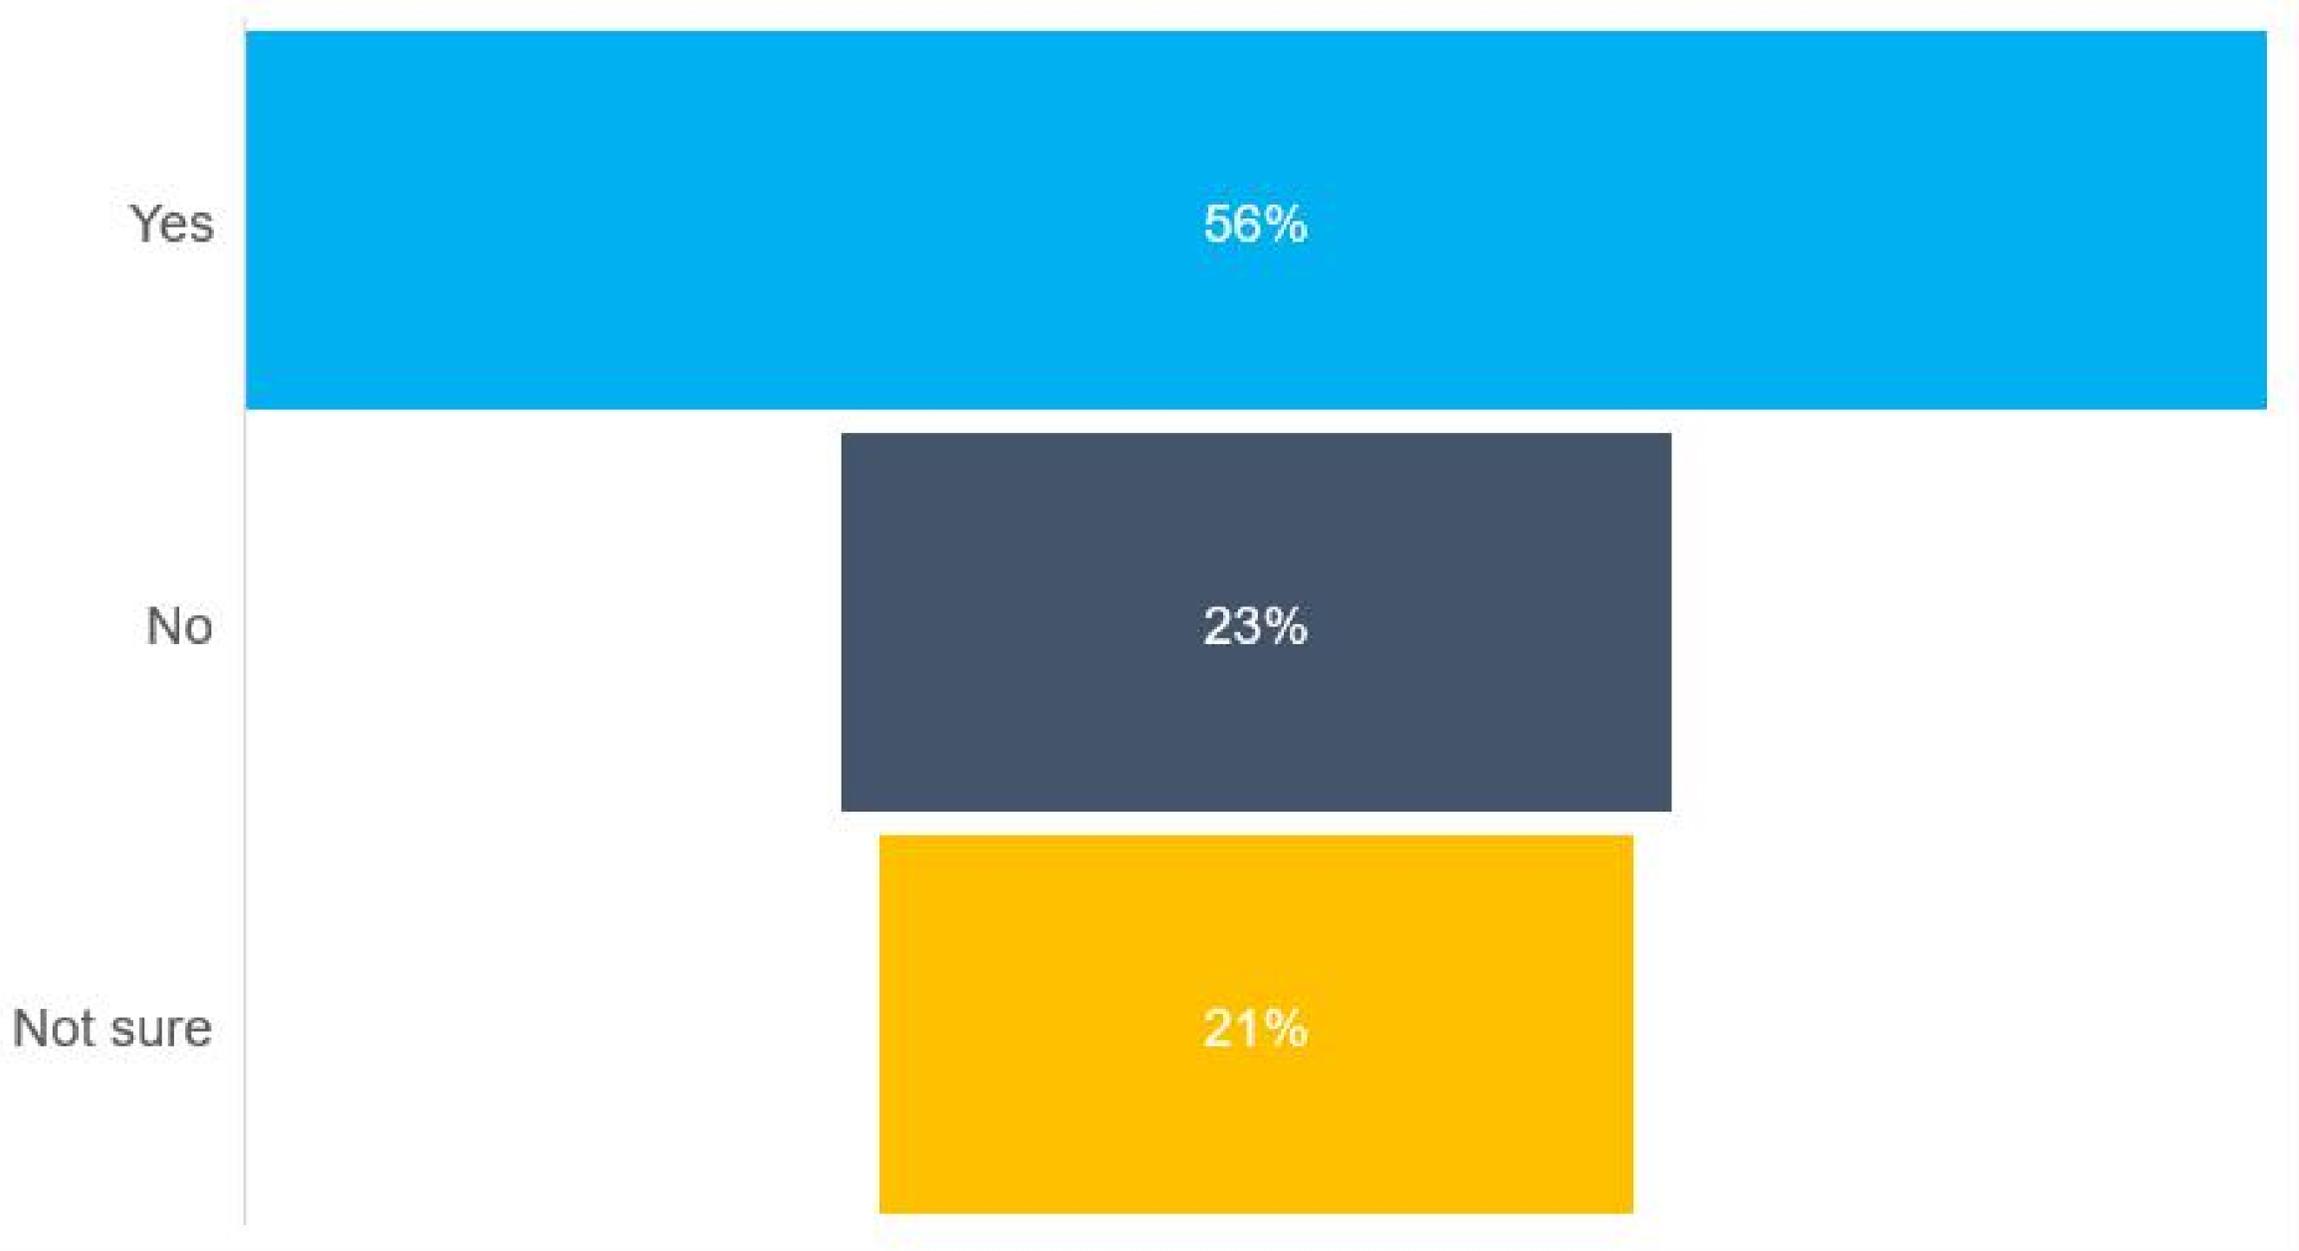

Q9. Has your organization ever ignored a security issue in the development cycle so it could be rushed out to beat competition?

Q10. At what stage does your organization introduce security into the development cycle of new products?

Q12. Does your organization thoroughly test the security of all new products before they are launched to the market?
