

Secure your migration to the cloud

Protect your IaaS, container and virtualized infrastructure security

Cloudsec Inspector is the only cloud security analytics solution with an integrated vulnerability scanner. Thanks to the continuous and automated monitoring of your infrastructure, you will be alerted of each new security misconfiguration and be able to focus your remediation effort with a clear and effective action plan.

Our solution offers full stack security assessment:

- Protects your applications, workloads and data which are constantly evolving with a DevOps approach
- Checks against cloud security best practices compliance
- Identify vulnerabilities in your cloud servers

When to improve your cloud security:

Moving into cloud, virtualized or hybrid infrastructure

Deploying containerized apps

Unsure about the risk levels of your cloud workloads

Want to improve security of your DevOps process

Benefits

Comprehensive analysis of your risk exposure

Fast and easy deployment

Infrastructure as a Service security best practice checks

Public, private & hybrid cloud infrastructure support

**Experts in Cloud,
Containers and Big Data**

**Registered patent
technology for
Clone&Scan**

**Founding member of the
Cloud Security Alliance**

Auto-discovery

- Network and servers are automatically discovered
- Always-on security perimeter changes
- No lengthy configuration

Integrated vulnerability scanner

- Continuous monitoring
- More than 60,000 vulnerabilities database
- Authenticated web scan

Multi-cloud Cloud, virtual and hybrid deployments

- Adapts to public, hybrid, private environments
- Supports various environments simultaneously in a single console

Workload analytics Security tests for IaaS, containers and Big Data

- Adapts to DevOps
- CSA, CIS, Docker and Hadoop analysis

Patented technology to protect & secure your data

- Industry leading method for stopping vulnerabilities creeping in
- Unrivaled solution to protect and secure apps
- Complete vulnerability detection solution across multi-cloud

Comprehensive reporting with actionable insights

- Comprehensive dashboard for risk exposure
- IT executive view
- Detailed views and solutions
