

# Credentials

Detect and retrieve compromised credentials in real-time

*81% of breaches use stolen or weak passwords*

Our Credentials module provides actionable intelligence around leaked, stolen and sold user credentials. We find the compromised credentials in real-time on the open, deep and Dark Web, along with information about relevant malware used to steal the information.

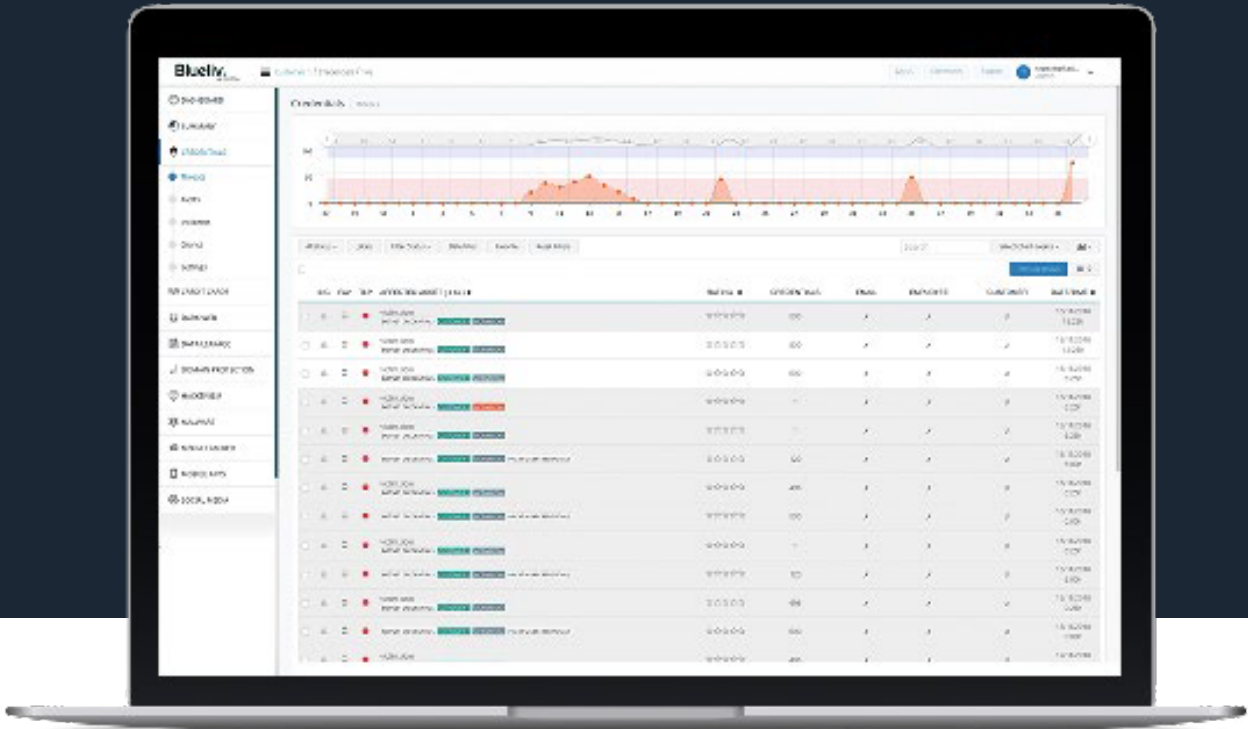

Blueliv's sinkholes, honeypots, crawlers and sensors are continuously searching for your stolen credentials, helping eliminate blind spots in your threat landscape.

## What business benefits does it deliver?

- 1.** Vastly reduce costs associated with incident detection and remediation
- 2.** Reduce chances of suffering data breaches caused by stolen credentials
- 3.** Mitigate the impact of GDPR penalties – mishandling data breaches could cost you €20 million or up to 4% of your annual turnover

## What does it do?

- 1.** Automatically detects compromised IPs and domains, plus identification and classification of malware infections
- 2.** Discovers compromised user credentials with access to your systems
- 3.** Enhances visibility of crime servers, rapidly reduces exploitation time by adversaries and improves incident response time

Blueliv is Europe's leading cyberthreat intelligence provider, headquartered in Barcelona, Spain. We look beyond your perimeter, scouring the open, deep and dark web to deliver fresh, automated and actionable threat intelligence to protect the enterprise and manage your digital risk. Covering the broadest range of threats on the market, a pay-as-you-need modular architecture means customers receive streamlined, cost-effective intelligence delivered in real-time, backed by our world-class in-house analyst team. Intelligence modules are scalable, easy to deploy and easy to use, maximizing security resource while accelerating threat detection, incident response performance and forensic investigations. Blueliv is recognized across the industry by analysts including Gartner and Forrester; and has earned multiple awards for its technology and services including 'Security Company of the Year 2019' by Red Seguridad, Enterprise Security and Enterprise Threat Detection 2018 category winners by Computing.co.uk, in addition to holding affiliate membership of FS-ISAC for several years.
