Malware

Aggressively hunt for targeted malware

Almost half of data breaches are caused by malware

Malware attacks are increasingly sophisticated, targeted, and much harder to detect.

Our targeted Malware module allows you to detect malware seeking to steal sensitive information or commit fraud.

Our aggressive solution proactively hunts down targeted malware and 'Man in the Browser' attacks, aimed specifically at your organization.

Through robust and continuous analysis of millions of malware samples per month, we provide forensic reporting on malware behavior targeting your systems.

What business benefits does it deliver?

1. Increase malware processing power and capacity, at a low cost

2. Frictionless support for your existing setup - no messy installation necessary

3. Maintain a safe distance from targeted malware using our intelligent sandbox, providing behavior, system, network and distribution reports.

What does it do?

1. Connection with network appliances automatically sends malicious binaries into a cloud-based elastic sandbox

2. Delivers real-time notifications for malicious campaigns targeting your organization

3. Provides automated alerts in the event of detected malware targeting your organization

4. Identifies 'Man in the Browser' attacks targeting you or your end customers using your websites

5. Ensures maximum coverage via continuous multi-platform malware tracker
