

# Mobile Apps

Monitor and detect rogue mobile apps

*Counterfeit apps continue to grow at a double-digit pace in mainstream app markets*

Malicious and illegal applications are hiding in plain sight in non-official marketplaces, luring your customers away and even stealing their data.

Our module specializes in detecting applications claiming affiliation to your organization or using company assets without authorization.

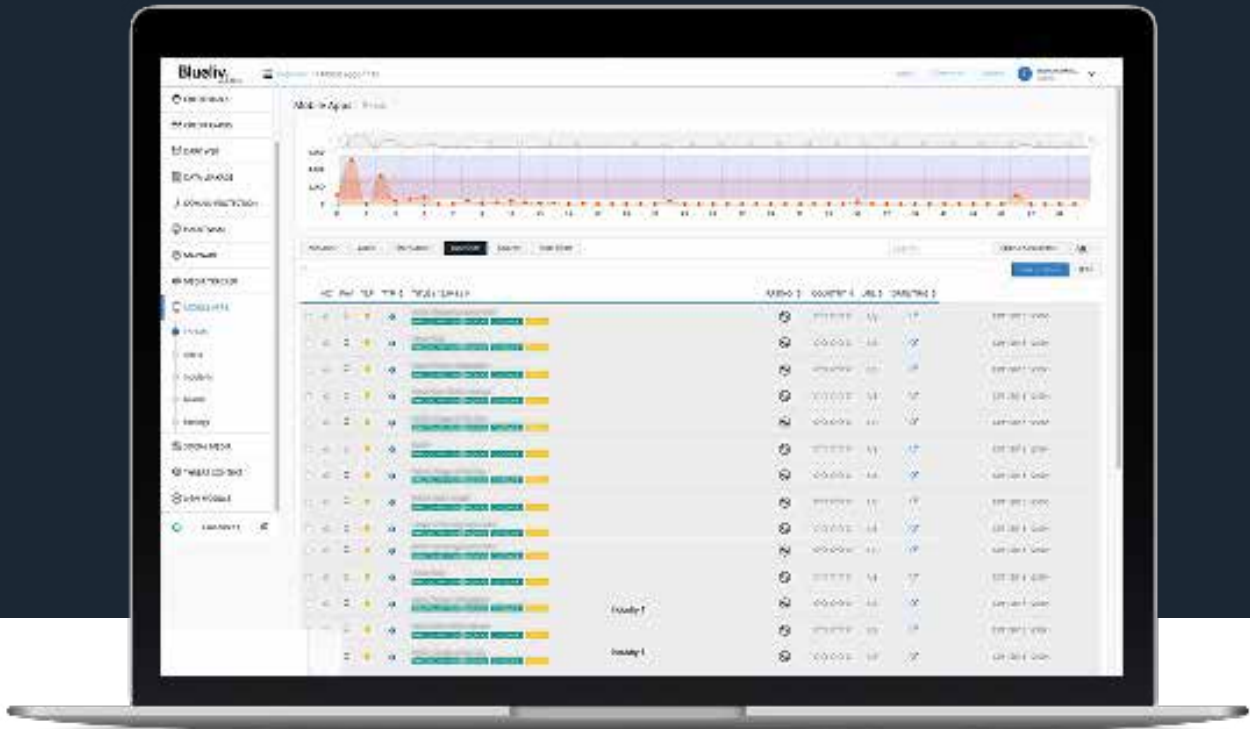

By identifying false, infected, modified and copied apps, we make it easier for you to protect your brand and reputation.

## What business benefits does it deliver?

- 1.** Safeguard your reputation from negative customer experiences, from unintentionally malware downloads to becoming victims of fraud
- 2.** Reduce business and security costs related to your mobile business
- 3.** Ensure that your business isn't unnecessarily fined for compliance violations

## What does it do?

- 1.** Real-time identification and alert system via a dedicated portal
- 2.** Provides a trail of evidence to successfully combat and dismantle rogue apps
- 3.** Full customization ensures maximum visibility of potentially harmful applications
