Fraudulent domains are a risk to your business and your end customers, with the goal of stealing information or damaging your brand.

Our Domain Protection module combats both phishing and cybersquatting attacks by proactively detecting attempts to acquire sensitive information.

This intelligence allows for countermeasures to be taken to protect your organization and your end customers.

**What business benefits does it deliver?**

1. Maintain confidence in your brand by identifying domains masquerading as a trusted website or those similar to your own
2. Reduce financial losses from fraud or compliance incidents
3. Improve your internal security tools and employee security knowledge

**What does it do?**

1. Provides automated detection of malicious sites, enabling fast and effective remediation
2. Dashboard provides detailed phishing attack information, helps identify trends, potential risk factors and generates remediation advice
