

OutscanNX

Continuous risk-based vulnerability management and threat intelligence

Discover and prioritize critical vulnerabilities across your network, cloud, and assets with OutscanNX our market-leading RBVM solution. Our unified solution provides complete visibility into your environment, helping you uncover weaknesses before attackers do.

With integrated risk-based scoring and advanced threat intelligence, you can focus on the most critical exposures first and accelerate remediation. Understand the true risks to your organization, surface imminent threats faster, and take action to reduce potential impact.

Delivered from the cloud, OutscanNX offers an intuitive dashboard, streamlined workflows, and seamless integrations to boost operational efficiency and deliver measurable results. By prioritizing vulnerabilities based on real exploitability, we help reduce exposure time, strengthen your security operations, and keep your organization compliant.

How we help:

- Continuous network, cloud and container vulnerability assessment
- Integrated threat intelligence to prioritize risks in one intuitive dashboard
- Solution based reporting to demonstrate results in real-time
- Scanningless technology and notifications keeping you continuously updated to new threats
- Workflows to reduce manual coordination of security scans

Why switch to Risk Based Vulnerability Management

Agile

Continuous delivery and monitoring for entire infrastructure

Speed

Improve patch management with predictive risk score

Insightful

Solution and risk-based reporting linked to your business risk

Automated

Fully automated and custom integrations

Collaborative

Real time access to customer support experts

Flexible

Custom licensing and scalability to fit your needs

Comprehensive

Vulnerability assessment for cloud and container environments

Data Sovereignty

Agent based scanning ensuring sovereignty of vulnerability data

V

"The most significant value we've realized since using Outpost24's Vulnerability Management Solution is the ability to more clearly view the impact and severity of risk we are exposed to."

Security Manager
Medium Enterprise Media &
Entertainment Company

Key Product Features

Our automated RBVM solution helps you prioritize vulnerabilities by identifying the biggest threats across your networks and cloud services. With agent-based scanning, you can deploy a private instance on your premises or within your own data center, ensuring full data sovereignty and real-time results in a unified interface. Delivered by Kubernetes clusters enhancing scalability, resilience, and operational efficiency within a single UI.

Solution-based reporting

Actionable insights and advice to get the best results with the least amount of effort

Seamless communication with customer support

Speak to our local customer support experts for faster validation & verification

Role-based access control

Manage access using roles and tags for complete peace of mind

Agent and Agentless scanning

Comprehensive security coverage whether you're at home or in the office

Scanningless scanning

Stay ahead of emerging threats without the need for frequent, resource-intensive scans

Custom notifications and tags

Customize messages sent to Splunk, providing a fully flexible Webhook-based integration and messaging solution

RBVM solution tailored to your needs

We have our own team of ethical hackers. That's why we approach security with a holistic view of your systems and pivot where a hacker would.

OutscanNX is the only solution that unifies vulnerability management and application security in one view, giving you complete visibility into risks across all your critical assets and devices.

We also provide integration points to your other security and operational technology, including Splunk, IAM, PAM and SIEM etc for a complete view of risk and mitigation.
