

Outpost24 Scale

Dynamic Application Security Testing with AI-powered Authentication

Scale is our market-leading DAST solution, designed by certified penetration testers and built for DevOps teams of all sizes. It is a highly automated scanner that interacts with web applications to identify custom code vulnerabilities and functionality flaws. With AI-powered authentication, Scale removes the need for manual authentication scripts, enabling faster setup, lower maintenance overhead, and resilient authenticated scanning as applications evolve.

With Scale, you can trust that your applications remain secure during large scale deployment activities. Scale delivers a low level of false positives combined with automated detection capabilities, so teams get actionable results without unnecessary downtime or cost.

DAST for Modern Teams

-  Automated, AI-powered authenticated scanning
-  Broad security coverage across all modern applications
-  Cost effective high-volume testing
-  Simplified compliance & assurance

Automated Vulnerability Detection:

Simplify your testing with Scale, our highly automated DAST scanner, enabling you to easily identify technical vulnerabilities in your application estate.

Continuous Monitoring:

Use Scale to test external, internal and COTS applications, ensuring they meet your organization's standards and don't introduce new vulnerabilities.

Full Coverage & AI-Authenticated Scanning:

Simplify the process of scheduling and managing authenticated scans for hundreds of web applications across multiple departments, environments, and subsidiaries.

Compliance & Quality:

Enhance your security controls, and ensure vulnerabilities are mitigated with structured and measurable insights for your application security program.

Continuous DAST for Modern Web Applications

Scale delivers automated security scanning with AI-powered authentication, providing comprehensive coverage for modern applications in a single, easy-to-use platform.

Expert Insights

Scale is designed and built with input from our certified penetration testing team providing low false positives and strong detection capabilities.

Continuous DAST

Automated DAST scanning with AI-powered authentication maps your application footprint and runs security tests to identify vulnerabilities. AI driven authentication removes the need for manual scripts, making authenticated scans easier to configure, maintain, and scale.

Actionable Insights

Scale provides an overall risk level of your application deployments, at a reasonable price. It is a standalone DAST scanner, that is integrated with the Outpost24 platform including attack surface monitoring, compliance, PCI ASV scanning and network security.

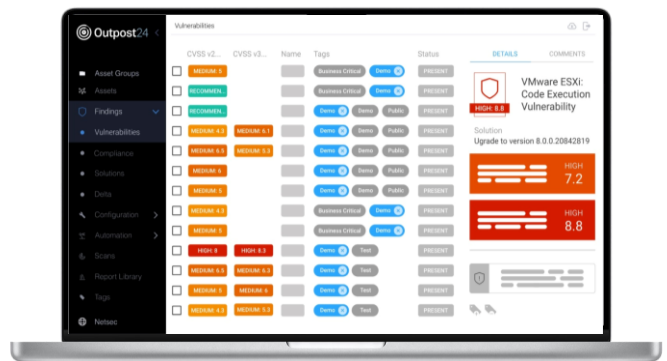

Enhanced Reporting

Scale reports and collates results in one interface, providing a holistic insight and complete risk view of your application risk.

Complete AppSec Solution

Scale can be used alongside our market leading Penetration Testing as a Service solution that automatically and continuously monitor your web applications for the latest vulnerabilities, ensuring continuous protection, zero false positives and results verified by our certified penetration testers.

- Penetration Testing as a Service delivered in one platform
- Flexible budget options to suit your needs and scope
