

Pentesting as a Service for Modern Web Application

Leverage an effective combination of manual testing with automation

Web application testing is a critical part of your organization's security posture, but the traditional pentesting process can't keep up with the pace of agile development. Manual pentesting is resource-intensive, slow, and expensive, and automated scanners are riddled with false positives that waste valuable time.

Our Pen testing as a service (PTaaS) solution combines a SaaS platform with experienced pentesters to deliver real time insights into your web application vulnerabilities for faster remediation.

What we test:

- Internet facing web application
- Live and test environment
- Main API used by the application
- Runtime vulnerabilities
- Business logic errors
- Compliance framework support for ISO, PCI, SOC2, HIPAA, CREST, and NIST
- Verify coverage of OWASP Top 10

Why switch to Pentesting as a Service

Agile
Continuous delivery and monitoring

Speed
No scoping or waiting for pentest resources

Insightful
Detailed findings with recommended fixes

Quality
Manual testing by certified ethical hackers

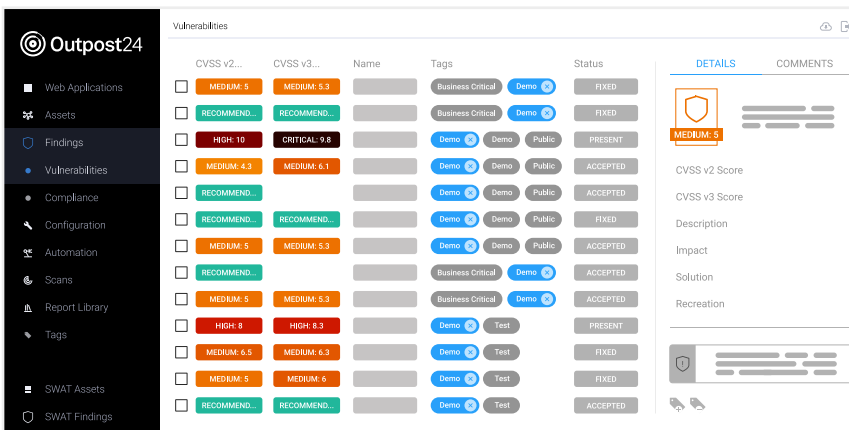

Collaborative
Real time access to pentesters

Reliable
Guaranteed zero false positives for high accuracy

Seamless
Unlimited* verification of the applied fixes

Cost-effective
Engagement tailored to your needs and budget

*Unlimited during engagement period

"The continual penetration testing and automated scanning solution from Outpost24 is vital as we're monitored for vulnerabilities 24x7. Manual testing and checks provide an additional security layer when there's a new version of the software to release."

John Hixon
R&D Director, CezanneHR

Key Product Features

Entire penetration testing lifecycle delivered on-demand via a combination of highly experienced ethical hackers, tools, and the Outpost24 Portal.

 Continuous Application Scanning	 In-depth Manual Pentesting for Logical Errors	 Managed Scan Configuration	 Guaranteed False Positive Free
 Multi-factor Authentication Testing	 Context Aware Risk Scoring	 Actionable Pentest Reports	 Seamless Communication with the Red Team
 OWASP Top 10 Findings	 WASC / CWE Findings	 NetSec (CVE Findings)	 Verification of Remediated Findings

On-demand PTaaS packages tailored to your needs

Penetration testing services from basic to advanced web app security assessment

	Assure 	Snapshot 	SWAT 
	Baseline insight into the security level for non-critical applications	In-depth security posture overview to secure new app launches or major updates	Continuous vulnerability scanning and penetration testing for business-critical agile apps
Manual pentesting	3 days	10 days	12 months
Verification of remediated findings	60 days	60 days	12 months
Access to Analysts for questions	60 days	60 days	12 months
Ad hoc/on-demand reports	✓	✓	✓
