Datasheet

CompassDRP

A centralized view on your risks from external threats with Attack Surface Management and TI-Powered Digital Risk Protection

Any organization operating online holds data valuable to cybercriminals, from financial transaction records to customer PII, confidential company assets to industrial IP. A hit on any of these can lead to catastrophic business impact, reputational damage and compliance penalties.

Asset Discovery

Detect known and unknown assets and shadow IT.

Attack Surface Score

Real-time alerts and a visual overview of risk to prioritize mitigation.

Risk Reduction

Brand protection, compliance and third-party risk governance.

Guiding You Through Your Attack Surface

Which assets are unknown?

Find shadow IT and assets that traditional vulnerability scanners miss.

Who is targeting you?

See who is targeting your organization, and from where, including on the dark web.

What is your attack surface score?

Rate exposure at asset level and prioritize what to fix first.

Are credentials exposed?

Find stolen credentials and see if they're being used to commit fraud.

Digital Risk Protection

Attack surface data fueled by threat data

Combine External Attack Surface Management (EASM) and Digital Risk Protection (DRP) for a comprehensive overview of your attack surface and the external threats your organization faces. Attack surface data is enriched with threat data covering Credentials, Dark Web, Data leakage and Social Media Monitoring.

Outpost24

Datasheet

External Threat Visibility, Organized Around the Risks Your Team Needs To Investigate.

Account Takeover Protection

Identify exposed accounts, leaked, stolen and sold credentials across open, deep and dark web sources, including malware-derived evidence.

Dark Web Intelligence

Monitor underground activity connected to your organization and gain context on threat actors, discussions and planned attacks.

Data Leakage

Discover sensitive documents, source code and other information exposed online, on deep-web sources or peer-to-peer networks.

Brand and Social Media Monitoring

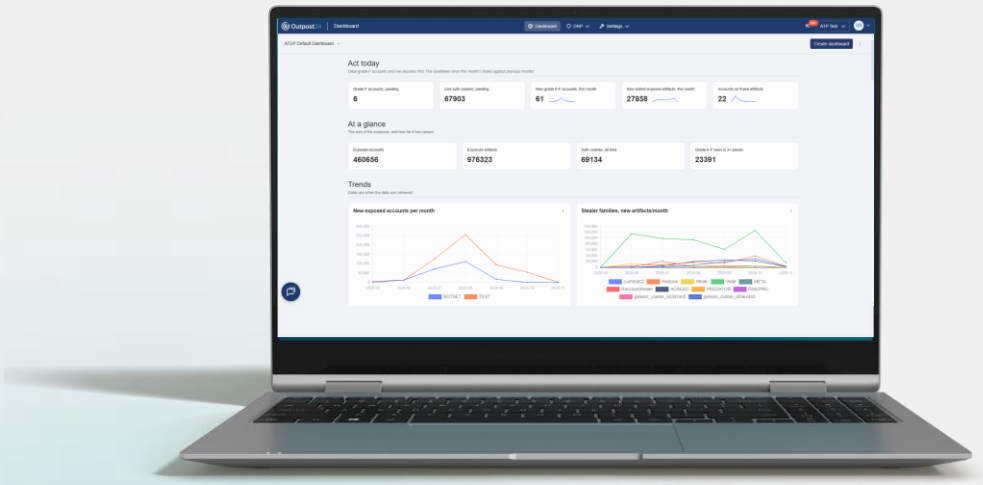

Find unauthorised use of brands, assets and claimed affiliations across websites, blogs, forums and social networks.

KrakenLabs Threat Intelligence

Threat actor reporting, indicators, vulnerabilities, TTPs, breach analysis and OSINT assessments.

Machine Readable Threat Intelligence

Connect intelligence to SIEM, SOAR and TIP tools, with flexible models for security teams, partners and MSSPs.

See Your External Exposure

Book a tailored demonstration of Outpost24 CompassDRP and discuss the sources, modules and workflows that fit your organization.
